1:03 PM

```
public class UserFactory {
    public void createNewUserAccount (String type, String userName...) {
        switch (type) {
            case "ATTENDEE":
                attendeeManager.createAttendee (userName, email, pas...)
                break;
            case "VIPUSER":
                attendeeManager.createVIPUser (userName, email, pas...)
                break;
            case "ORGANIZER":
                organizerManager.createOrganizer (userName, email, pas...)
                break;
            case "SPEAKER":
                speakerManager.createSpeaker (userName...)
        }
    }
}
```

By Jiayi Su, please feel free to contact me if you spot an error, or you think there is something to improve.

I am happy to improve it and make it better:
